## Software Engineer in St. Louis, MO

A person who is highly motivated by curiosity and a stubbornness to understand, I am seeking a platform to be able to contribute my skills in a meaningful way to help answer the questions that tech poses to our rapidly adapting society.

## PROJECT EXPERIENCE

### TechJobs — LaunchCode Education

- Final project to complete LaunchCode's LC101 course using Java, Spring framework, MySQL, and Hibernate.
- Employed principles of object oriented programming and object-relational mapping to add database functionality to a job searching app
- Used CRUD repositories to inject the requested data from the database to the view

## WORK EXPERIENCE

### Independent Contractor — Reedy Press, St. Louis, MO

June 2021 - Current

- Created Excel pivot tables to analyze QuickBooks data to determine royalty check amounts.
- Configured Quickbook data into Excel files with extensive use of the formulas tool to convert data into importable information to the CRM (Insightly)

### Presales Specialist — Worldnet Solutions, St. Louis, MO

Feb 2018 - May 2021

- Engaged telecom carriers for pricing for businesses, and building quotes to compare pricing in Microsoft Excel.
- Technical duties require a detailed and nuanced understanding of technologies in the telecom industry that would best suit the customer's needs, including MPLS, fiber, hosted voice systems, SD WAN, and many other types of technology.

### Archivist/Personal Assistant — Laura X Institute, St. Louis, MO

October 2016 - May 2017

- Archived articles from newspapers and magazines with the end goal of donating the collection to University of Illinois
- Personal assistant activities such as attending meetings and taking notes, scheduling, and coordinating events.

## EDUCATION
